GO FISH

What You Need
- Players: 2 or more
- Standard set of 52 playing cards
- Tokens: 3 for each player (e.g. coins, or poker chips or whatever you can improvise)

Setting up
1. Each player starts with 3 tokens.
2. One player ("a dealer") shuffles the cards and deals out 5 to each player.

Aim of the Game
To accumulate the most pairs or, to be the first player to have no cards left.

How to play

Each player bets one token on their hand

Once the cards have been dealt then players pair any cards with the same numerical value – eg. pair of fives, pair of aces and places them to one side.

A player then asks another player for specific cards they need to complete a pair in their own hands. If a player has the requested card, it must be surrendered. If not, the requesting player is told to "Go fish!" and should take a card from the draw pile.

The winner receives all the other players tokens
