

## TREFOIL EGG IN A BASKET

- Using the trefoil cutter, remove a trefoil shape from some sliced bread.
- Put a little bit of butter in the pan and wait for the pan to warm up
- Place the sliced bread, with the cut out trefoil shape, into the pan and fry for about 20 **seconds**.
- The crack an egg into the trefoil shaped hole.
- Once the egg has started to cook, flip the whole thing over
- (you can also fry the trefoil piece that you removed at the beginning – up to you.)
- Fry until you are happy with the consistency of the egg and colour of the toast
- If you would like, add some grated cheese on top of the egg just before you remove it.
