

## Science & Technology – Promoting Guiding using Technical Equipment

*\*Each patrol will need an iPad for this session.*

### ACTIVITY

Make a 5 (ish) minute video in your patrol to promote guiding.

(Think about what activities you do in Guides / what do you learn? What would you say to someone who is thinking of joining Guides? This is your chance to demonstrate how much you enjoy the meetings, what you learn and the friends you make – Promote Guiding!)

Ideas:

You can talk about Guiding and the friends you have made and / or you can demonstrate / show one of the activities you have done.

For example:

- Balloon rockets!
- Demonstrate the Mobius strip?
- Origami (Japanese night)
- Knots (demonstrate how to tie a reef knot etc.)
- Make a chatterbox
- Semaphore
- Making a weather worm
- How clouds make rain / tornado in a jar
- You could sing some campfire songs.
- Read out the promise or law
- Talk someone through all the badges on the sash.
- Take a video around the Guide Hall?
- Or just play a game
- Video someone making a nature bracelet.

You can do one or more of these or choose something completely different!

Then show the other patrols the videos that have been made.
